Wednesday, December 7, 2022

09:00-10:30    Room 3
[SY(T4)1] Nutritional management of sarcopenia and frailty
Chair: Masafumi Kuzuya, Meitetsu Hospital / Nagoya University, Japan
Overview: Specific nutritional status and involvement in health problems in older people

- Home-based exercise and nutrition interventions for frailty

- Combined exercise and nutritional intervention for sarcopenia and frailty

- Nutritional strategy for sarcopenic dysphagia

13:15-15:15    Room 3
[SY(T4)2] Perspective of nutrition therapy for diabetes
Chairs: Kazunori Utsunomiya, The Jikei University School of Medicine, Japan
        Kee-Ho Song, Konkuk University Medical Center, Korea

Effect of Carbohydrate-restricted Diets and Intermittent Fasting on Type 2 Diabetes Management

Dietary guidelines and management status of Korean Diabetes

Nutrition therapy for diabetes in Japan

Nutrition Therapy for Diabetes: Clinical Guidelines, Clinical Trials and Clinical Practice

Thursday, December 8, 2022

09:00-10:30    Room 9
[SY(T4)3] Role of dietary nutrition guidance in food allergy
Chair: Motohiro Ebisawa, National Hospital Organization Sagamihara National Hospital / World Allergy Organization, Japan

The many faces of food allergy

food allergy management in Japan

Nutritional guidance in food allergy
Friday, December 9, 2022

09:00-10:30    Room 7
[SY(T4)4] Nutritional management for liver disease with a focus on steatohepatitis and liver cirrhosis

Chairs: Akinobu Kato, Morioka Municipal Hospital, Japan
        Teerha Piratvisuth, NKC Institute of Gastroenterology and Hepatology, Thailand

Looking back on the progress in nutritional management for liver disease
Recent progress of nutritional management for liver cirrhosis
Impact of treatment of diabetes in patients with non-alcoholic fatty liver disease
Nutritional management for liver cirrhosis in Thailand

13:15-14:45    Room 7
[SY(T4)5] Can diet protect the heart and gut? The role of fats and fibre

Organized by The Nutrition Society (UK)
Chair: Julie Anne Lovegrove, University of Reading, UK

Dietary fats and cardiovascular disease – Dispelling the myths
Cardiovascular benefits of whole grain consumption: evidence explained and mechanisms explored
Fibre interventions for colorectal neoplasia prevention: a re-evaluation of design and interpretation considerations.

Saturday, December 10, 2022

09:00-10:30    Room 5
[SY(T4)6] Nutritional management in CKD patients

Chairs: Yoshihiko Kanno, Tokyo Medical University, Japan
        Bui Van Pham, Pham Ngoc Thach University of Medicine, Vietnam

Overview
Nutrition Management for Patients with Chronic Kidney Disease
Nutritional management for CKD patients in Japan
Nutritional management in elderly CKD patients in Japan

T4: Nutrition and Management of Diseases
Saturday, December 10, 2022

13:15-15:15 Room 5

[SY(T4)7] Roles of vitamins and minerals in health promotion

Chairs: Kiyoshi Tanaka, Kobe Gakuin University, Japan
       Imelda Angeles Agdeppa, Food and Nutrition Research Institute, Philippines

Reciprocal interplay of ZIP4 and ZNT1 in zinc absorption

Clinical and societal implication of vitamin insufficiency.

Inadequate nutrient intakes in Filipino schoolchildren and adolescents are common among those from rural areas and poor families

Dietary management of phosphorus in CKD patients

---

Sunday, December 11, 2022

09:00-10:30 Room 13

[SY(T4)8] Advances in nutritional anemia

Organized by Sight and Life Foundation

Chairs: Crystal Karakochuk, University of British Columbia, Canada
       Klaus Kraemer, Sight and Life Foundation Basel, Switzerland

Novel approaches to oral iron supplementation

The Emerging Role of Vitamin D Deficiency in Anemia

Cognitive and behavioral consequences of iron deficiency in children and women of reproductive age

Safety of interventions to reduce nutritional anaemia

---
